

**II. AMENDMENT TO THE SPECIFICATION**

Please replace paragraph [0069] with new paragraph [0069], shown below.

[0069] Figure 3 illustrates a visualization of an example similarity matrix produced by an embodiment of the method of the present invention. Graph 310 is a visualization of a similarity matrix computed from an example parameterized multimedia signal. Each element of graph 310 is shaded with a gray scale value proportional to the similarity value of the element. Bright areas represent high similarity, and dark areas represent low similarity. As an example, a scale runs from 0 to 3000 along both the x and y axes.
